

Tornado, earchquakes?! No, it is XEvil.

Posté par Natalienoift - le 21 Septembre 2017 à 06:03

This message is posted here using XRumer + XEvil 3.0

XEvil 3.0 is a revolutionary application that can bypass almost any anti-botnet protection.

Captcha Recognition Google, Facebook, Yandex, VKontakte, Captcha Com and over 8.4 million other types!

You read this - it means it works! 🟡

Details on the official website of XEvil.Net, there is a free demo version.
