Instagram is our story advised through appropriate photos. Photos in this place should be characterized by appropriate stylistics - it must be nice and artistic. Instagram was created to catch moments, and their binding can not be anyhow. Beautiful circumstances of nature, favorable light, appropriate cropped all elements make up the photography that will arouse interest.

In the event you have your own website or blog on the hosting site, you can create a special, responsive HTML + CSS page that looks like a menu. Buttons with links to specific places. The power is that it will be in your domain name, so you can envision it's more "professional". This will likewise be better to see stats for getting into this site and reports of clicks on specific links.

You can take it on WordPress. Most you need is a LandingPage page template (without a footer, menu, sidebars - a blank page) and on it you can put eg a photography and buttons (buttons) with links, even by using a site builder (eg Elementor). And that's all! Simple, right?: -)

We pull away the phone, turn on the camera and what next? Photographer and tumblr (IsRudo) advises: "First, it will probably be worth considering what is the topic of the photo. Then choose the elements that will complete this theme. A good topic is half the battle. I recommend taking photographs in the daytime - we will avoid problems with big noises or blurry photographs from the hand. Well, we will not have to use the built-in adobe flash. It's worth stabilizing the camera - it will allow us to increase the exposure time and decrease the ISO value, even with the béance closed. "

You required a picture, but you think it's mediocre? Aleksandra Jedli? ska, the originator of the facebook group "Instagram for Demand" and blogger (Slowly) says: "I have a few tips that assist bring a neat picture to the state in which it commences to please myself. My favorite tricks are "whitening" the image before applying the filter. This is not about terme conseillé the whole picture, but selectively only bright elements. I do this with the aid of tools to correct a smile in the photographs or by brightening and lessening saturation on a specific part of the image. And all this in the applications contacting companies.
